/ TECHNICAL INFORMATION

FLOOR MOUNTING

The mounting plates are sleeved inside the aluminium profiles and allow for level adjustment during installation of +/- 10 cm.We recommend fixing with 4 M12x150 stud bolts per mounting plate.

SUBLIMATED WOOD FINISH

Wood-effect sublimation is the industrial process that enables thefaithful reproduction of the shades and grain of wood on durable metal surfaces.It requires no maintenance and is fully recyclable.

DOUGLAS FIR

Naturally classified as Grade 3, Douglas fir has a distinctive pinkish colour and takes on a natural grey hue over time.Choosing wood means accepting all its characteristics and how it changes over time: knots, variations in colour, cracks… all of which contribute to its identity and charm.
